

# Spotlight on: MYP IB Learning

7th and 8th graders created geode inspired weavings in art. They discussed the meaning, formation, coloration and prevalence of geodes. Many, many examples were shown and actual geodes were brought in by students. Students had to create a geode shaped loom from cardboard. They painted and added pastel details to resemble a geode. Then warp thread was added and yarn for the weft portion. Hanging embellishments were added at the end.

“Development in the arts is a dynamic process, and not necessarily linear. Students move freely through a creative process towards a deeper understanding of the arts. The process of creating artwork, as well as the product, demonstrates what students have experienced, learned and attempted to convey.”
